

레노보 노트북 윈도우 재설치 - 원본 상태로

The screenshot shows the Windows 8.1 Control Panel window, specifically the 'System and Security' section. The breadcrumb trail at the top reads 'Control Panel > System and Security >'. On the left sidebar, 'System and Security' is selected. The main content area features 'Action Center' and 'Windows Firewall' sections. 'Action Center' includes links to 'Review your computer's status and resolve issues' and 'Troubleshoot common computer problems'. 'Windows Firewall' includes links to 'Check firewall status' and 'Allow an app through Windows Firewall'. Below these, a red box highlights the 'Action Center' and 'Windows Firewall' sections. Further down, a 'Maintenance' section is visible, containing a 'Disable apps to help improve performance' box with an 'Open Task Manager' button. Below the maintenance section, a message states 'If you don't see your problem listed, try one of these:'. Two options are shown: 'Troubleshooting' (Find and fix problems) and 'Recovery' (Refresh your PC without affecting your files, or reset it and start over.). The 'Recovery' option is highlighted with a red box. Below this, the 'Advanced recovery tools' section lists 'Create a recovery drive', 'Open System Restore', and 'Configure System Restore'. At the bottom, a red box highlights the text: 'If you're experiencing problems with your PC, you can refresh it in PC settings.'

Control Panel Home

- System and Security
- Network and Internet
- Hardware and Sound
- Programs

Action Center
Review your computer's status and resolve issues | Change User Account Control settings
Troubleshoot common computer problems

Windows Firewall
Check firewall status | Allow an app through Windows Firewall

turn on Windows Update.
Turn off messages about Windows Update

Maintenance

Disable apps to help improve performance
You have 3 or more new apps that start automatically and run in the background. This might slow down your PC. Open Task Manager to review your startup apps and disable any that you don't use.
Turn off messages about startup apps

Open Task Manager

If you don't see your problem listed, try one of these:

- Troubleshooting**
Find and fix problems
- Recovery**
Refresh your PC without affecting your files, or reset it and start over.

Advanced recovery tools

- Create a recovery drive**
Create a recovery drive to refresh or reset your PC, or to troubleshoot problems, even when it can't start.
- Open System Restore**
Undo recent system changes, but leave files such as documents, pictures, and music unchanged.
- Configure System Restore**
Change restore settings, manage disk space, and create or delete restore points.

If you're experiencing problems with your PC, you can refresh it in PC settings.

Refresh your PC without affecting your files

If your PC isn't running well, you can refresh it without losing your photos, music, videos, and other personal files.

[Get started](#)

Remove everything and reinstall Windows

If you want to recycle your PC or start over completely, you can reset it to its factory settings.

[Get started](#)

Advanced startup

Reset your PC

Here's what will happen:

- All your personal files and apps will be removed.
- Your PC settings will be changed back to their defaults.

[Next](#)

[Cancel](#)

⬅ Do you want to fully clean your drive?

Just remove my files

Use this if you're keeping your PC.

Fully clean the drive

Use this if you'll recycle the PC. This can take several hours.

← Ready to reset your PC

This will remove your personal files and apps from your PC and restore all settings to their defaults. If you use File History, make sure the latest versions of your files were copied to your File History drive before you proceed. Your PC will restart.

Reset
